2. Dr. Wysomerski, formerly head of the Raw Materials Research Department at Leuna, is reportedly working at Leningrad-Sestroretsk. He is 64 years old. He states that living conditions are primitive, but that health services are excellent. There is an abundance of medical supplies, and the food situation is adequate. The lower classes are stated to be quite friendly towards the Germans, and German children are well looked after.
3. Dr. Lowenberg, formerly a chemist at Leuna, is working on synthetics at Gorki. An elaborate plant for the manufacture of caprolactan is reported to have been erected there. ~~Comment: See [redacted]~~ The complete Leuna apparatus has been installed at Gorki, and all research development and manufacture is carried out there. Methanol ovens from Leuna have recently been sent to Tashkent, where a project of considerable size is being constructed.
4. Dr. Asinger now works in a scientific institute near Moscow. It appears that Asinger has pushed Dr. Herold ~~Comment: See [redacted]~~ and 17583) into the background.
5. Kurt Pfluegel in Kuibyshev has written to a friend in Mannheim. In very guarded language, Pfluegel appears to be trying to convey the fact that there are no Junkers people at work at Kuibyshev. Nothing is going forward there and the stories of a new factory at Kuibyshev - high altitude test plant, etc. - do not appear to be true.
6. a. Ing. Georg Mann in March 1948 was in Leningrad. His address was Post Box 601, Leningrad 44.
b. Dr. E. Roux was in the USSR with his Kreiselgeräte colleagues.
7. a. Dr. Kurt Magnus and Dr. Hans Hoch, who in 1946 were deported from the Institut Rabe, Bleicherode, to the USSR, are now living on an island on Lake Seeliger.
b. Dr. Hoch is engaged in the testing of guided anti-aircraft rockets and Dr. Magnus in the testing of homing torpedoes. It is said that results obtained with the rockets are very unsatisfactory.

8. It is reported that Dr. von Bock is now stationed 14 km. south of Stalingrad. He has been exhaustively interrogated on his activities in Dyhernfurth about a year ago. It appears that von Bock was deported primarily for the knowledge and experience gained at Dyhernfurth and that he will establish a similar factory in the USSR. It is further reported that the papers of Dr. Dietl (sic) were destroyed before falling into Soviet hands and that, therefore, von Bock and Dietl are not likely to be associated in the minds of the responsible Soviet authorities.
